LED rear combination lamps
18-inch alloy wheels & Pirelli tires

Seamless Horizon Lamp, Full LED headlights (projection type)

Interior

The hi-tech panoramic curved display and simple interior design take passengers to even greater heights of satisfaction.

Available 2.0i N Line (Design)

* The steering wheel (Design) of the performance version may change with the options.

Hyundai's next-generation infotainment system (ccNC: connected car Navigation Cockpit)

The panoramic curved display's cluster, navigation tool, and head-up display all feature the same graphic theme, giving them a streamlined look. Functions include natural language-based voice recognition, media streaming, and real-time road navigation.

* The screen layout/design of the infotainment system may change with the system.

Share via Facebook

Column-Type Shift-By-Wire

The SONATA is intuitively controlled through a Column-Type Shift-By-Wire system, enabling smooth shifting.

Dual-zone full automatic air conditioning (with fine dust sensor, air cleaning mode, auto-defog system, and after-blow function)

The touch-operated, wide-screen air conditioning controller allows touch control of seat heating/ventilation and steering wheel heating.

Function

Control your vehicle with even greater ease through the latest features.

In-car fingerprint authentication system (startup/permissions)

Through fingerprint recognition, securely start your vehicle or use in-car features.

Digital key 2

The vehicle can be locked or unlocked by the system through an iOS (iPhone, Apple Watch) or Android smartphone (such as a Samsung phone).

The digital key can be shared with up to 10 devices.

* Please refer to Hyundai Motor's website for rules of digital keys.

Smart power trunk

If the driver steps near the rear of the vehicle for three seconds with the smart key within 10m (33ft),

the trunk will open automatically, requiring no other action and enabling the driver to remove items from the vehicle easily and conveniently.

Remote Smart Parking Assist

This function lets the driver enter and leave a parking space from outside of the car.

While outside the vehicle, the driver can use the smart key to move the vehicle forward or backward.

Surround View Monitor

This function displays real-time video footage of the vehicle's immediate surroundings to ensure safe parking.

Blind-spot View Monitor

Engaging the turn signal to either direction shows the driver video footage of what's next to and behind the car in the instrument cluster.

* The screen layout/design of the instrument system may change with the updates.

Cutting-edge technologies provide an advanced mobility experience that has been designed to satisfy practical needs.

Motorized rear seat curtain

The curtain that blocks sunlight from streaming in through the rear window can be controlled with a single button. When the vehicle is put in reverse, the curtain automatically lowers to give the driver a clear view.

Active air purification system

The air purification system is automatically activated to improve air quality inside the vehicle by filtering out fine dust and decomposing the odors in.

Passenger relaxation comfort seats

It's easy to rest, too-touch function allows the passenger in the front to put the seat in the most comfortable position possible for them.

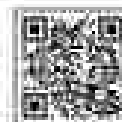

In-car Payment/*N*-pass.

By registering their credit card with In-car Payment, the driver can pay for parking and gas directly by touching the infotainment screen, eliminating the need to have cash or a physical credit card on hand. If the driver applies for a *N*-pass, they can pay toll fees without a physical credit card.

BOSE premium sound (12 speakers, external amp)

Enjoy the rich quality offered by a premium BOSE sound system, which is powered with 12 cutting-edge speakers.

Share on Facebook

Built-in Cam 2

Exclusive, high-resolution, front and rear-view cameras offer sharp video in any form of day along with audio recording, large capacity external storage, LRA processing, and seamless playback of driving time (including rear view). Hyundai enables the transmission of shock sensor-activated videos (before/while parking) and provides information on the status of the built-in camera.

Augmented reality navigation

The driver's screen intuitively displays vital information (e.g. destination, vehicle-to-vehicle distance, front vehicle start alert) through AR technology.

Performance

Take leisurely drives, made possible by the vehicle's fortified stability and safety features.

Smartstream Gasoline 1.6 Turbo engine

11.1 Combined fuel economy
km/l (lit. speed w/o DCTPS inch)

Hyundai SmartSense

Hyundai SmartSense keeps the driver and passengers safe and protected.

Forward Collision-Avoidance Assist

This function, after scanning the vehicle's immediate surroundings, warns warnings of collision risk. If, after a warning is issued, the vehicle is still suddenly slows down or the risk of (front) collision with a car, motorcycle, pedestrian, or bicycle increases, automatic control is activated. Automatic control is also activated when there is an increased risk of collision from a vehicle approaching from the front while making a left turn at an intersection (with turn signal) or from a motorcycle or car driving in front and at the same time.

* Since the advanced driver assistance system (ADAS) is a function that assists the driver's operation, always drive with caution.

* The system may not operate correctly or properly depending on the surrounding environment and driving conditions.

* In addition, the function may operate with restrictions depending on the regulation related to the combination of the advanced driver assistance system. (In detail, refer to the owner's manual.)

* The above specifications are applied differently depending on the city, province, and specifications directly selected by the vehicle purchaser in consideration of local conditions and preferences.

Blind-spot Collision-Avoidance Assist

A warning is issued if risk of collision with the vehicle next to or behind you is detected while changing lanes. If, while attempting a forward exit (from a parallel parked position), risk of collision with the vehicle next to or behind you is detected, the automatic vehicle control function is activated.

Safe Exit Warning

If a vehicle approaching from the back is detected after the car is parked and the passengers are opening doors to get out, a warning is issued.

Scan to
Hyundai.com/kr

Navigation-Based Smart Cruise Control (safety speed concourse control)

This system keeps the driver comfortable with speed limit or road conditions when driving on a highway or a regular road. It automatically reduces the car's speed just before it enters a reduced speed zone. After leaving the reduced speed zone, the vehicle is brought back to its designated speed.

Lane Following Assist

This system keeps the car in the center of the lane.

Rear Cross-traffic Collision Avoidance Assist

If a collision risk is detected from the right or left while driving in reverse, the driver is issued a collision warning. If the collision risk increases after the warning, the brakes are activated automatically.

* Since the advanced driver assistance system (ADAS) is a function that assists the driver's operation, always drive with caution.

* The system may not operate smoothly or properly depending on the surrounding environment and driving conditions.

* In addition, the function may operate with restrictions depending on the regulation related to the configuration of the advanced driver assistance system. (In detail, refer to the owner's manual.)

* The above specifications are applied differently depending on the city, province, with specifications directly selected by the vehicle purchaser in consideration of local conditions and preferences.

Hybrid

Improved performance functions enhance the Hybrid nature of the driving experience.

12V battery reset button (Hybrid only)

A high-voltage, integrated battery system not only starts and supplies electricity but also promotes the vehicle's battery system monitoring during normal and while driving or when the battery has died due to prolonged idling.

Paddle shift (regenerative control)

Regenerative braking is level-adjustable, allowing driving performance that matches the driver's style and/or preferences.

Hybrid-exclusive contents

The SONATA offers several types of exclusive information, including the vehicle's status while driving, fuel efficiency, energy flow, and ECO driving status, to maximize the driving experience.

Ride comfort technologies (e-Comfort Drive)

• e-Ride Control

When driving over a speed bump or accelerating, the torque of the motor is controlled to minimize shaking.

Driving performance-enhancing technologies (e-Dynamic Drive)

• e-Handling

When driving or leaving a lane on a curved section of road, the vehicle's center of gravity shifts with the torque of the motor to improve steering responsiveness and safety while turning.

• e-EHA (Electrically Evolved Handling Assist)

The function enables timely assistance of a preceding collision and also secures vehicle stability after the collision has been avoided.

• e-Traction

The SCMAA offers improved maneuverability and ride comfort during sudden acceleration or cornering.

• e-DTC (Electrically Assisted Dynamic Torque Vectoring Control)

The function offers improved steering linearity by utilizing torque vectoring technology to control driving force.

N Line

H Genuine Accessories

H Genuine Accessories supports the needs and lifestyles of customers who seek new levels of customization with a wide range of convenient functions and leisure products.

New car options

LED Lighting plus package

Luggage light
Sunvisor lamp

Door spot lamp
Luggage lamp

Aftermarket-exclusive products

Sunvisor sunglasses case
USB-C to USB-A adapter

Sunvisor sunglasses case
USB-C to USB-A adapter

* While range of aftermarket accessories can be purchased from Hyundai Shop (<http://hyundai.com>) & Hyundai Brand Mall.

* The available list may vary depending on the H Genuine Accessories package. For detailed specifications, please refer to the price list for the relevant model.

* The USB-C to USB-A adapter was designed to be used exclusively with Hyundai Motor devices. Hyundai Motor does not assume any responsibility in the event of malfunctions if used with other devices and/or accessories brands.

N Performance

Enjoy the appearance and function of N Performance parts, each of which has been applied with Hyundai Motor's peerless motorsports technologies.

Monoblock brake & 19-inch lightweight wheels package * Available for purchase separately only-wheels

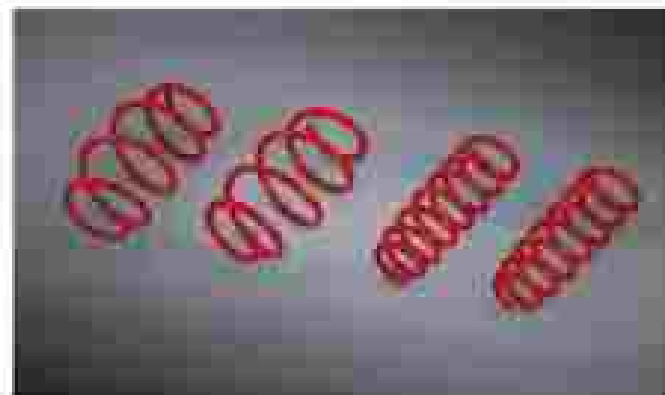

Monoblock 4-piston caliper & Hybrid-disc & Low steel pad

19-inch black lightweight wheels

Real carbon wheel cap

N Performance suspension

Monotube shock absorbers
Real lowering spring

* The SONATA N Line 2.0T is equipped with a standard rear shock absorber. Adding the N Performance suspension gives the vehicle a sporty edge and enhances the driving experience.

(The SONATA N Line 1.6T model is not equipped with the monotube rear shock absorber.) * The above listed N Performance parts can be applied only to the SONATA N Line. (N Performance suspension only applicable to N Line 2.0T selected)

** The availability of the items shown above depends on the unit level and the region selected. For further information on specifications, please refer to the price sheet for the respective model.

Specifications

Specifications

[illegible]

	30-year/500,000-Mile Powertrain warranty (Electric motor) Hybrid High-voltage battery 48V/21 60kW Power Control 48V/21
Warranty for other parts	

The fuel economy described above is based on the standard model and may differ during actual driving depending on road conditions, driving techniques, cargo load, vehicle accessories, and weather temperatures. Some of the vehicles presented here include optional specifications, as their appearance may differ from the car as purchased. The specifications, content, and content presentation have been so modified to improve vehicle quality and performance. The engine performance described above is the "real number," a real measure reflecting actual resistance that compares with legislation enforced by the U.S. Ministry of Fuel and Transport (see 300). It is not necessarily lower than "Official Number" (the printed measurement). Actual fuel-consumption rates include some specified factors. Fuel economy presented here may differ from actual experience. A high performance drive has been selected with a low fuel and may cause some (due to the nature of the performance) fuel burn. This is a normal phenomenon. Some specifications may vary or be subject to change without notice. All of the measurements in this brochure apply to the (standard) 1999 U.S. model. Therefore, the use of the word "and" in the U.S. model is not to be confused with the word "and" in the U.S. model, with the same effect and quality of service between.
